

Enjoy Your Home with Low-Maintenance James Hardie® Siding Products

No other siding product provides the durability, low maintenance and beauty and character of wood like sustainable [James Hardie® siding products](#). James Hardie fiber-cement siding resists damage from:

- wet, humid climates
- wind and hail impact
- cold, windy climates
- termites and other wood-eating insects

If you choose to perform basic maintenance tasks, here are some suggestions to keep your James Hardie siding and ColorPlus® technology finish looking like new:

- To remove dirt and debris, wash-down the surfaces using water and a soft brush or rag. (Power washers are not recommended.)
- Clean out gutters, blocked pipes and overflows as needed.
- Periodically check all caulk seals and joints and make touch-ups when necessary.
